# SALE OF THE DEXTER

Reported that New Yorkers Are Negotiating.

#### PRICE IS \$3 PER SHARE

BASIS OF \$600,000 FOR THE PROPERTY.

Experts to Examine the Mine-Bingham Company Buys Smelter at Bingham Junction-Report on the Ajax-Minority Stockholders In Daly Threaten Trouble.

It leaked out yesterday that during the two weeks spent in New York by John Dern previous to his departure for France, he arranged the preliminaries looking to the disposal of the Dexter company's mine and mill at Tuscarora, Highland Boy. Nev., and the statement comes from a most trustworthy source that the figure involved was considerably more than half a million of dollars, the be-Hef being that not less than \$3 a share, or on a basis of \$600,000 for the whole

property, is being asked.

It is known that since Mr. Dern's departure the Dexter directors have held several important meetings, and yesterday the statement was made that experts would be at the mine within the next few days to conduct an examination in behalf of the intending purchasers, and though nothing directly official has yet been given out, a few days will more than likely bring the whole matter to the surface.

#### SMELTER SITE SETTLED.

Deeds For a Little Over Forty Acres Filed For Record.

Copper & Gold Mining company's fight, they projected will be located at Bingham Junction, on the east side of the Jordan The ball was river and north of the Old Jordan & Galena site, owned by the United States company. According to the warranty deeds filed for record yesterday, James B. Jenson of Sandy, for a consideration of \$5,500, conveyed to the company 30.68 acres and Charles Hogenson contrib-

uted ten acres for \$800.

Now that title to the ground, which includes all water rights, has been secured, the active work of putting the ground in shape for the buildings will commence at once and a most busy scene will be there presented during the next few months.

#### CONDITIONS AT AJAX.

Never Looked So Promising Says Mr. Weir.

(Special Correspondence.) Mammoth, March 31.- "My trip here at this time," remarked Thomas Weir, ore than ever convinces me that the Ajax bids fair to become better than an average mine. To my notion it through the Daly grounds and found never looked as promising as it does fault with the price at which the Marnow. This week we will market four sac mill was being leased to the Oncars of most excellent copper ore quite tario. And thus he went through transsimilar to that we put out last week, actions of the company from its early similar to that we put out last week, and, in fact, about every week lately, and in point of values it is much better than the average ore formerly obtained in the Ajax. This coming week we will commence sinking from the 700 level, and will go at least 200 feet deeper, and possibly more, before doing any extensive searching. We know the chute continues vertically, because we are mining ore in a winze on the 700, or between the seventh and eighth levels. I have every reason to regard the Ajax as a most likely property, and none to think unfavorably."

Ackelorer as a most likely property, and none to think unfavorably."

went to the city this morning to look after the sampling of about 100 tons of ore. Touching on the conditions at the Tintic Iron, Mr. Weir said they were still drifting northeasterly on the third, fourth and fifth levels, and had crosscut in several places, but as the lime was very hard and the work is being done by hand, progress had been slow. He has scarcely reached the point yet where he has expectations of encoun-

### TINTIC SHIPMENTS.

Southern End of the District Is In Evidence.

(Special Correspondence.) Robinson, March 31.-The south end or the district shows up real strong and encouragingly this week, the Shoebridge, Showers Consolidated and Tesora all being contributors. Another good feature is the initial shipment of the Richmond-Anaconda; the material increase of the Carisa, and the return of the Eureka-Hill. In addition to the continued remarkable record of the Centennial-Eureka, the Mammoth, Gemini and Swansea people show their usual generous contribution. In keep-ing with The Herald forecast, the Carisa mine is surely improving rapidly, and setting a pace better than a young-ster. The following includes everything in the way of ore, concentrates thing in the way of ore, concentrate sales in and bullion up to Saturday evening:

Cars of penses.

### STRIKE NEAR DIAMOND.

Lead Vein Discovered on Rising Sun Mountain.

(Special Correspondence.) Diamond, March 31.-Quite a bit of excitement has prevailed here during the past two days over a reported lead ore strike said to have been made on the south slope of Rising Sun mountain, about two miles due south of this place. Miners from this place, Silver and Mammoth have visited the locality and are said to have located some claims. The ledge is said to be very strong and mineralized to the surface, and can be easily traced for a distance of three miles. Some regard it as the same vein as the Old Susan is on, and others think it the continuation of the lode being worked by Mrs. Marx of

ance that operations will soon be resumed in the New Klondike. The company has canceled a number of obligations and is preparing to interest to take the continued in regular order, but it seems to have turned away from the shaft some, so the cross-cut is being the continued in the continued in regular order, but it seems to have turned away from the continued in regular order, but it seems to have turned away from the continued in regular order, but it seems to have turned away from the nent work in the Buckeye gives assur-

lead, is mixed with that of the 450, cop-

PRODUCTION FOR MARCH.

Decrease in Ore and Bullion, Increase In Cyanides.

The ore and bullion settlements for the past month amounted to \$1,239,898, and, as compared with February's production, were a decrease of \$634,670, a showing which is accounted for in a great measure to the breaking up of the roads in several camps and a cur-tailment of production on the part of the Ontario and several other mines. The weather has now become settled, however, and reports from all parts of the state indicate that roads are fairly good now and the season's shipments should strike a normal average during April

In the cyanide market a marked improvement is noted, the receipts at the sampling rooms of the Consolidated Kansas City Smelting & Refining company being 3,827 pounds, as against 2,563 pounds in February. The value of this product, estimated at \$30 a pound, would make its value \$114,810, or an increase of years \$230. crease of nearly \$38,000 over the pre-

ious month.
In addition, the Golden Gate proper ty's production of cyanides and bullion would add another \$100,000, with an amount not less than that from the

#### THE DALY MEETING.

Actions of Minority Stockholders Presage Trouble Ahead.

The stockholders of the Daly Mining company met in adjourned session again yesterday, the bone of contention being the report of the committee appointed at the annual meeting to examine and report on the affairs of the company. When that report was submitted early in the month it was so voluminous that the minority stockholders, at whose instigation it was prepared, asked time to consider it, yes-

by the vigor which it displays in opposition to the management, and according to Messrs. P. J. Daly and George As announced in the columns of The ing to Messrs. P. J. Daly and George Herald would be the case, the Bingham W. Moyer, who are conducting the fight, they propose to carry the war go. Mr. Bothwell has secured some in-

The ball was started yesterday when Judge Howat moved that the corgnit-tee report be accepted, ratified and ap-proved. As soon as the motion was seconded and stated P. J. Daly took the lease and bond on a group of copper floor and, report in hand, proceeded to claims from the Page brothers. Quite floor and, report in hand, proceeded to occupy the time of the stockholders for a solid hour in explaining why the re-

the company's ownership and manner of securing an interest in the Weber Coal company; declaring the purchase was made a year or two before it was authorized by the board of directors. He found fault with the acquiremen and sale of an interest in the Utah Eastern railway, and said that to him it looked as though over half a mil-lion dollars had been put into coal lands and railroads which should have Raven Mining company, which is workgone into the hands of the stockhold-ers in the form of dividends. He protested against the arrangement which allowed the Daly-West to hink unfavorably."

Superintendent Morris L. Nebeker vote on his own report.

In reply to questions regarding what nication with heavy stockholders of the company, and though he had not as yet received anything definite on the proposition, he thought the mine would be opened in the near future. And to further questions, he replied that the directors would likely be called togethen early in April.

### ALICE ANNUAL REPORT.

Company Closed Down the Mill and Mine. The officers of the Alice Gold & Sil.

ver Mining company, the Salt Lake cor-Robinson, March 31.—The south end of the district shows up real strong and encouragingly this week, the Shoebridge, Showers Consolidated and Tebridge, Showe report to the stockholders, sums conditions at the property as follows It was decided at the end of the third quarter by the board of directors to cease mining by days' pay and also the running of the mill, on account of the low price of silver and the decrease in the values of the ores mined. It was, however, thought best to continue the working of the mines by the "tribute system." as the ores mined by tributers ould be sold on the market. the present time the receipts from ore sales have about paid the current ex-

> It will be seen by the superintendent's report that there are large bodies of sulphide ores blocked out in some of the mines. We have been endeavoring to find a suitable process for the Jepara-tion of these ores, so that the same can be profitably mined.

> ment of receipts and disbursements it will be observed that the disbursements it will be observed that the disbursements exceed the receipts by \$17,276.14. This was occasioned by the low price of silver and the decrease in the values of the ores mined, which occurred from month to month during the year.
>
> It has been the desire of the entire board to keep the property in operation, hoping that either the price of silver would advance or the values in the ore increase, but, unfortunately, neither has happened. Therefore it became necessary to close down the mill and cease operations by days' pay in order to save further loss.

### TARBET'S SMOKEHOUSE.

Work Going on Steadily at the Historic Butte Mine.

Alex H. Tarbet returned from Butte yesterday morning, after an inspection trip to the Smokehouse property, which he is exploiting under a bond. Mr. Tarbet says the development work is go ing along steadily and everything being done now is in the hardest kind of granite. The main ore chute has not been cut into yet, but he expects to receive word almost any day that it has been encountered in a cross-cut being run to intercept it from the 200-foot level. When the shaft was first startde being worked by Mrs. Marx of ureka.

Evidence of continued and permaent work in the Buckeye gives assurbeen had the dip, as it appeared on the

nent work in the Buckeye gives assurance that operations will soon be resumed in the New Klondike. The company has canceled a number of obligations and is preparing to take up all outstanding claims.

Superintendent Brighton of the Showers Consolidated has commenced to make air connections by opening a shaft between the third and fourth levels.

Continued operations in the ore bodies at the Shoebridge-Bonanza during the past week disclose gratifying conjunctions. Mr. Carruthers has raised another car of shipping ore, which will be continued on the excavations after the close corporations as \$221,500. The contributors during the month of March the samount distributed by Utah mines outstanding claims.

Superintendent Brighton of the Showers Consolidated has commenced to make air connections by opening a case of the shaft will be continued on the twenty of the close corporations, which are not reported, was \$122,500. The contributors during the month of March the smount distributed by Utah mines outside the close corporations, which are not reported, was \$122,500. The contributors during the month were Silved the close corporations, which are not reported, was \$122,500. the Montana Ore Purchasing company) against the Boston & Moatana Lompany to recover a judgment for \$2,172,500 for alleged interference with the working of the Johnstown mining claim for

The plaintiff states that in 1898 the defendant instituted suit in the United States court for injunction against the Chili company pending the trial of the case; that the plaintiff was restrained free; from extracting ore from the Johnstown for the period named, losing \$2,-70,000 thereby; that the injunction has been wholly dissolved and the suit itself. dismissed; that the plaintiff was pre-vented from mining ores of the claim, and that the lease has been forfeited.

#### ACTIVITY IN IRON COUNTY.

Colonel Milner Returns From the Pinto District.

Colonel S. B. Milner and Glen R. Bothwell have returned from a trip to Iron county, where they went about a week ago to look over the great Utah iron fields which are beginning to show so much activity.

Speaking of the Milner-Dear-Lerch

group, consisting of an even fifty claims in all, Colonel Milner said yesterday that development work is going along satisfactorily and everywhere that exploratory work has been performed the results are simply astonish ing, and have a great deal more than met his expectations. The Pinto mining claims Nos. 7, 8, 9 and 10 have an especially fine showing, and when they were located it seemed doubtful whether they contained anything. The quality of the ore seems to improve The minority does not represent a country is full of experts, the coloner large amount of stock but what it states and they seem to cover up their lacks in holdings is more than made up by the vigor which it displays in opposition to know who they represent and what they are there for. They seem to be they are there for.

terests in the camp.

The iron deposits are not the only mineral resources receiving attention in the district just now. Thompson & Frew of Salt Lake have lately taken a and a few days ago a four-foot vein of fine copper ore was cut into which, a solid flour in explaining why the report was not satisfactory.

He registered a strong protest against the salary lists; declared there was a bogie man in the woodpile regarding metal. It is a beautiful showing of copper and those who have seen it pro-nounce it as being one of the big things in southern Utah.

#### RESERVATION ELATERITE.

Supt. Ferron of the Raven Company to Draw Up Maps.

A., D. Ferron, superintendent of the ing elaterite deposits on the Uintah reservation, under lease, is in town. known, and that the reports that during the last year his mere manipulation. company has been working only one vein, but has shipped about 250 tons of elaterite to Chicago, where the headquarters of the company are located. They have also had several prospecting parties in the field, which have discovered several more very valuable veins. Mr. Ferron has been engaged in surveying these new veins during the last two months, and is now in the city mapping them. He also states that the snow has been very heavy this winter, and all roads were impassable by teams for eight weeks. It is melting rapidly now, however, and the farmers in that country fear a drought this coming

#### M'GARRY'S IRON CLAIMS. Development Work to Be Pushed Prior to Obtaining Patents.

James McGarry, who is the owner of with development work and keep things moving until he has performed

for the entire group.

Mr. McGarry ordered his supplies yesterds; and when he gets back to camp he expects to put on a force of men large enough to do the necessary work prior to patenting within the next

#### ALASKA ARTICLES FILED. Salt Lake Corporation to Operate in Cape Nome.

The Alaska Gold Mining company yesterday filed articles of incorpora+ tion with the county clerk. The capital stock is \$30,000 of the par value of 10 cents each. The company vill operate mines and mining claims in Alaska and the Cape Nome mining district and have its general office in Salt Lake City. The following officers have been chosen by the company: David Keith, president; Moses Thatcher, vice presi-W. S. McCornick, treasurer, and A. C. Ellis, jr., secretary. These offi-cers, except Mr. Ellis, will be directors of the company, along with W. H. Dickson, Elwood Madden and H. F. Evans. The incorporators of the company, in addition to the above named, be profitably mined.

By referring to the secretary's statement of receipts and disbursements it will be observed that the disbursements exceed the receipts by \$17,276.14. This exceed the receipts and disbursements it was a considered to the above named, are W. C. Buck, W. V. Rice, F. D. Hobbs, A. R. Carter, P. A. Snell. Edward Bell, Charles G. Horsfall, B. F. Redman and Ben Pearson of Terace, Utah. Mr. Elwood Madden has taken up his residence at Cape Nome.

#### CENTENNIAL-EUREKA ORES. Total Production in March Was 140

Cars. The Centennial-Eureka was in yesterday's market with ten cars of copper ores. During the month the great Tintic producer sold something like 140 cars. Although no statistics have been given out officially it is pretty safe to say that the entire lot will average the company \$30 per ton net, making the total amount received for 2,800 tons 884,000. The shipments for the month have been pretty evenly divided between the silver-gold and copper ares. Superintendent Allen expects to keep the production so the production and for fire the production and the production the production not far from 100 tons per

### MARCH DIVIDENDS.

Total of \$122,500 For the Month of March.

The directors of the Swansea Mining company got together yesterday and posted their regular monthly dividend of \$5,000, which is made payable on the 10th inst., the books to close on the 5th inst. With this dividend added, the total paid out by the company since its incorporation is \$221,500.

stalled, is being enclosed. It has been started up and is working very satisfactory.

ANOTHER BUTTE SUIT.

Two Millions Demanded From Boston & Montana,

Butte, Mont., March 31.—Suit has been instituted in the district court by the Butte, Mont., March 31.—Suit has been instituted in the district court by the Chili Gold Mining company (otherwise the Montana Ore Purchasing company) at least \$37,500; the Silver King, \$75,000; the Montana Ore Purchasing company) at least \$37,500; the Silver King, \$75,000; the Swansea, \$5,000; the Grand Gulch, \$2,400, and some say that the Bullion-Beck will get in line for \$10,000. There may be some others that will pay this month. At any rate, the prospective dividends of Utah mines for April will not be far from \$350,000, outside of the close corporations. close corporations.

#### The Daily Fake.

Daisy Gold Mining company, and the lders of the \$25,000 trust deed against that ill-fated West Dip property have been endeavoring to find out where the neeting announced under the glaring headlines in the Daily Blunderbuss or Friday morning was held. None of the officers of the company nor the holders of the trust deed seem to know anything about such a meeting and the story is pronounced by them as a rank

There seems little probability of the stockholders holding any more meetings in an effort to save the property and it is pretty generally conceded that nothing is left for the holders of the trust deed to do but to begin foreclosure proceedings.

#### GRAND CENTRAL SLUMP. Stock Goes Down to \$3.75 and Then

Rises to \$5.

Grand Central cut up some funny one along broker's row was willing to offer a reason for it. Everyone seemed to look upon the slump as a sort of a mystery. When the exchange opened yesterday morning the stock was still on the toboggan and inside of a few hours. on the toboggan and inside of a few hours it was forced down to \$3.75, while just a week before it was an active seller at \$6 a share and better. It has been known for several days that George Q. Cannon one of the di-

ectors, has been quietly unloading his holdings. Some who had been at a loss to know of any other reason, ascribed the drop to the loosening up of the Cannon

But a change came yesterday afternoon and just as quickly as the stock went down in the forenoon it advanced again and before the close of business hours last evening the stock was hunt-ed for and bids of \$5 a share made for

Why Mr. Cannon let out his stock could not be ascertained, but all that had been marketed from his holdings pretty well absorbed before last

Nothing but good reports have been sent out from the Tintic mine lately, and a gentleman who came up from there ysterday said that the property has not looked so well in six months as it does at the present time.

Several conservative mining men ex-pressed the opinion last night that a crowd of bears had taken the opportunity to depress the market when the action of Director Cannon became known, and that the whole thing was

#### Ore and Bullion.

Ore and bullion settlements yesterlay amounted to \$79,200, as follows: T. R. Jones & Co., ores, \$33,300; bul-McCornick & Co., Mingo bullion, \$4,800; ores, \$12,400; cyanides, \$3,300. Bamberger & McMillan, ores, \$12,800. Commercial National bank, ores,

Metal Market. Silver, 59%c per ounce.

#### Copper, 15%e per pound. Lead, A. S. & R. Co.'s price, \$4.57½; New York brokers', \$4.45. From Split Mountain. (Special Correspondence.)

Vernal, March 28.-R. C. Camp returned mountain district, where he has been doing some quiet prospecting. The ten valuable iron claims in the Pinto doing some quiet prospecting. The iron district of Iron county, is still in gentleman gives some very flattering fron district of Iron county, is still in the city, but expects to leave for camp tomorrow. Mr. McGarry stated last night that he had not closed up any deal for the sale of the property, but he has made arrangements to go ahead with development work and keep where both gentlemen are inthings moving until he has performed camp, where both gentlemen are in-the required amount to secure patents of the most promising property in the camp. They will be absent a couple of

### Mining Notes.

Jackson McChrystal went out to Tintic ast night. The delinquent stock sale of the Little Pittsburg company occurs tomorrow.

The assessment on the Omaha mine of the West Dip becomes due tomorrow. Hartwig A. Cohen is expected to arrive from California some time this week. Superintendent R. G. Legg of the Dexter will leave for Tuscarora again today. The 5 cents assessment of the West Mountain Placer became delinquent yes-

terday.

The annual meeting of the stockholders of the May Day Mining company is scheduled for tomorrow.

The stockholders of the Bonneville Mining company will meet tomorrow to choose officers for the ensuing year. terday.

Will C. Higgins of the Mining Review went to Silver City Friday evening and remained over till yesterday. Thomas Weir returned from an inspec-tion trip to the Ajax mine of Tintic yes-terday, which he reports looking pros-

C. R. Ford, bookkeeper for the Utah Consolidated Mining company, is still in New York City. He expects to leave for home the last of this week.

The Montana & Denver Reduction company of Bearmouth, Mont., reported at the gold sampling rooms with an initial shipment of fifty pounds of cyanides yesterday. V. P. Strange has returned from a trip to Tintic. While there he visited the May Day, and he pronounces it as being "a whale" and is preparing to make a big record.

The late assessment levied on the stock of the Yankee Consolidated became delinquent yesterday, and information given out by an official of the company last night was to the effect that it was nearly all paid in

all paid in.

J. H. Haverley, the old-time minstrel promoter, who during the past few years has been devoting his attention to mining, came in from the east Friday, for the purpose of making a round-up of the purpose of making a round-up of the Deep Creek country. He will leave to-

John J. Daly, accompanied by Mrs. Daly and an invalid child, are now in southern California, and a letter just received from Mr. Daly says their trip may be extended into Mexico before they return.

Superintendent R. C. Chambers will go out to the Ontarlo today and return again tomorrow night. Advices from the Marsac mill yesterday were to the effect that melting would begin about Wednesday, so the first consignment of Ontario bullion since the run on crude ore began will probably be sent to market by the end of the week.

the week.

Charles H. Scheu and Walter G. Filer spent yesterday at the Honorine mine at Stockton. Mr. Scheu says that the shaft has now attained a depth of twenty-seven feet below water level and that sinking will go steadily forward till the 100-foot mark is reached, when a drift will be started east to intercept the first big ore chute. The new pump is working admirably.

RISE IN DALY - WEST

THE PARK CITY STOCK CAME CLOSE TO \$20 A SHARE.

-Centennial-Eureka Dividend Makes the Stock Go Higher-Mammoth Advances.

Trading in mining stocks last week was very good. Those of the investment class were the most active, however. There was quite a demand noticeable for speculative securities. The general tone of the market was good, and while some declines have been regis tered the advances more than evened up things.

Ajax continues to be in demand and several blocks were sold at strong figures. Alice was inactive and there has been no special call for Anchor. Bullion-Beck began the week in good shape and the stock found ready buyers at \$3 capers yesterday. For several days the a share and a little better, but on Fri-

> \$100,000 or \$1 a share on all the issued stock. The company is capitalized for 200,000 shares, half of which still remains in the treasury. Since the an nouncement of the dividend, which is made payable on the 5th inst., the stock has made some big advances. On Friday \$28.50 was bid for it on 'change week previous. The stock has been very active some days, the bidding for it being very spirited, but the week passed without the buyers and sellers being able to agree on a price. In Boston, sales were quite heavy. Chloride Point has been sluggish and the stock has been quoted around low water mark. Dexter gives no signs of improvement. Daly-West has been the real feature of the week. At the beginning of the week the stock started out in good shape and each day recorded an advance up to Thursday, when the stock touched the high water mark and was curbed by brokers at \$19.70. Friday and Saturday the stock fell back a little and closed yesterday with \$19.25½ bid and \$19.33 asked. Daisy remained active below a cent a share, and a large amount of stock changed hands Nothing has been done to straighten out the company's affairs, but it is likely that steps will be taken to foreclose the trust deed for \$25,000 shortly. It looks as if the minority stockholders are go-ing to be left out in the cold and some of the larger shareholders have gone to their limit and don't care what becomes of the mine.

Eagle & Blue Bell is still suffer-ing reverses. Geyser-Marion passed the week low and inactive. The same can be said of Galena. Grand Central has been on the Grand Central has been on the toboggan all week and the curious art of it is brokers who are supposed to be strictly up to date on what is going on have been dumfounded as to the reason for the slump. Officers of the company have declared that the mine is all right, but nevertheless the stock has gone down and while insiders have been blaming it all to the brokers they have not been in the field as buyers. The mine has been doing very little The mine has been doing very little shipping, so it begins to look as if there is something the matter.

Lower Mammoth has held up to strong figures pretty well, but weakened toward the close. The executive committee concluded contracts during the week for machinery which wil greatly facilitate the working of the mine hereafter. New air compressors are to be put in and the steam power heretofore employed is to be substitut-ed by electricity furnished by the Tel-

luride Power company of Provo.

The management of the Mammoth mine has given out the assurances that

May Day got up to \$1.13, but kept close to \$1.12 nearly all the week. Good news still continues to come from the wine, and the latest is that a good vein of ore has been struck on the fifty-foot level, something entirely different

Ontario, of course, held up to strong prices, but no stock was brought out. Nothing was done in Orient.
Petro continues lower and not much

# For Man and Young Man. CLOTHES.

Mr. Man who goes to a tailor, you think we can't fit you. Come in and try on, if we can't it will only cost you your time; you can spare that.

If we can, keep half your money. Just mention one of the swell ones to test us with. It's of handsome pin stripe worsted, round cut or square cut coat, double-breasted style of vest, fine serge linings, and tailored just like your tailor's

for \$35.00, our price - - and many others down to \$7.50.

Mr. Young Man who thinks he has to go to a tailor, you come, too. We've suits here just like he'd make for you and at just about half the price. We mean this, money back says how much; will he do that? We've a handsome blue serge in round cut or square cut, good linings and good tailoring, this for ages 12 to 19 years, price \$7.50.

Then we've a double-breasted style in the blue serge at \$8.50.

We've dozens of others, too, \$4.50 to \$15.00.

ONE PRICE,
